## IMMERSE YOURSELF... PEOPLE, ART, CULTURE AND HISTORY

**NAVAJO DINE** The Navajo Nation is the largest Native American Nation in the country, with roughly a third of the population living in New Mexico. The majority of the Navajos live in Arizona and a small cluster reside in Southern Utah. Window Rock, Arizona, next to the Arizona/New Mexico border, is the Nation's capital. Navajoland is in the northwest corner of the state and is surrounded by magnificent land formations, breathtaking views, distant biking and great fishing. There are several fishing lakes, the San Juan River and hunting for deer, turkey, bear and small

game is also permitted. The Northern Navajo Nation Fair is held in Shiprock, NM every year in early October featuring an abundance of fresh farm products, four-mile parade, rodeos, Indian dancing and an Indian Market as well as the first fall sacred Night Chant Ceremony. Visitors travel many miles for sacred Navajo ceremonies such as the Night Chant and Mountain Way Chant. Northwestern New Mexico is also a great place to purchase Navajo tapestries, silverwork, pottery, paintings and baskets that have gained worldwide recognition. Area shops and trading posts specialize in the beautiful artwork created by local Native American artists. For information on visiting the Navajo Nation contact:

The major Hopi villages are located at the top of three mesas in northeastern Arizona. Each village is independent, practicing its own style of government. All Hopi villages have gifted artisans.

First Mesa people are known for their Hopi polychrome pottery. Second Mesa people specialize in Hopi silver overlay jewelry and coiled basketry. Third Mesa people produce works of wicker and twill basketry. Visitors are welcome. Touring of Hopi lands requires a Hopi or Tewa Guide. If visitors are allowed to witness a Hopi ceremony, they should be respectful and questions regarding the sacred event are discouraged.

# PHOTO TIPS & TOURS

Top Tips from a Professional Shutterbug

Paul & Katie McPherson

[shutterfreak.com](http://shutterfreak.com)

A vertical silhouette of a person stands on the left side of the page, pointing towards the right. The background is a warm, golden sunset over a desert landscape with rolling hills. The person's shadow is cast onto the white background behind the text.

**B**orn and raised in Farmington my earliest recollections are of great adventures through sandstone painted ravines searching for lizards, foxes, blooming cactus and other fascinating signs of life. I remember being mesmerized by elaborate cloud formations and indescribable color-filled skies. I didn't own a camera at the time but those cherished memories are forever burned in my brain. Now, with photography and video as my profession, I've had the blessing of being able to bring those memories to life with the camera. Following are a few helpful tips and a list of photo ops not to be missed. After all - if you're visiting this area without a camera, you've missed the point.

### **TIP 1 CAPTURING NEW MEXICO SKIES**

Never try to predict what the skies are going to do.

I've shot literally hundreds of sunsets and sunrises, and witnessed thousands, and have found them impossible to predict. I personally feel like June through August, in conjunction with monsoon weather, produces the most dynamic cloud formations. How those formations will end up reflecting light remains a mystery but it's the best "season" for capturing a majestic NM sunset. Be committed to the process. It may take multiple days of shooting to get "the shot."

### **TIP 2 PHOTOGRAPHING PEOPLE**

There are a million ways to shoot portraits, however if you're planning to capture them at sunset you need to have an external light source. On camera flash will work, off camera flash is better and multiple off camera lights is ideal. If you can balance the cameras exposure so the sunset is perfect in camera and the exposure of the subject with external light falls within those same levels, you're golden. I set the camera to manual white balance at Kelvin 5000-ish, then pump the external light just enough to illuminate the subject, while making sure the camera is naturally capturing plenty of information from the sunset to work with. There's really no bad time of day to shoot depending on the result you're looking for, but for me personally the "Golden Hour" is preferred.

(Continue on next page)

### TIP 3 DISCOVER SITES

Never be afraid to take adventures down unknown County Roads. I can't tell you how many old homesteads and incredible pieces of property I've stumbled on just rolling the dice on a hunch about a County Road. I call this "American Picker Style-Freestyle Photography." I can count on one hand the number of times people didn't let me on their property. This land is filled with some of the most hospitable people on the planet, who will welcome you into their world and share their views, if you're interested.

### TIP 4 LENS CHOICE

If I could carry 3 lenses in my bag I would want to have a wide angle, a telephoto with a decent zoom range and a solid macro. As a Canon shooter, my lenses of choice would be the 14mm L f2.8, the 70-200 LII f2.8 and the 100mm L macro f2.8. Anything within those ranges will work just fine. If you have the budget to get into the 400mm+ range, you'll have endless opportunities especially with wildlife.

### TIP 5 CELL PHONE SHOTS

Never settle for one shot. I take 15-20, if I want it to be a great one. Move around! Bend your knee, hold the phone over your head and more as all can affect the way the camera sensor auto-interprets light. Favorite apps: For landscape, HDR it is Snapseed, for lifestyle photos it is VSCO and PicTapGo.

## SCENIC DRIVES

### NAVAJO ROUTE 5 SCENIC ROUTE

Drive south of Farmington on Hwy. 371 for approximately 22 miles, turning west on Navajo Route 5 (signage will indicate Burnham). This stretch of road is just under 30 miles and provides many photogenic landscapes featuring elements of the Bisti Badlands, high desert plateaus and majestic land formations. In the horizon you will see Bennett Peak and Ford Butte with Shiprock Pinnacle in the background. The end of Navajo Route 5 is Hwy. 491. Turn north and travel 25 miles on the highway where you can either head west on Navajo Route 13 or continue on to the community of Shiprock.

### NAVAJO ROUTE 13 SCENIC ROUTE

Navajo Route 13 passes over the Chuska Mountains to the community of Lukachukai, AZ. This pass is one of the most picturesque drives on the Navajo Nation with beautiful green pine trees, brilliant red sand and stone cliffs and provides a magnificent view of the Four Corners region from the top of the mountain. This pass is popular with photographers and locals as a favorite scenic drive.

## NOT TO BE MISSED PHOTO OPS

### ANGEL PEAK / KUTZ CANYON

With more than 10,000 acres of rugged terrain and a 7,000-foot peak in the form of an Angel, photographers love to explore this scenic area. Angel Peak is visible for many miles in any direction and is surrounded by the maroon, gray, and yellow mudstone and sandstone found in the Kutz Canyon badlands. Located 15 miles south of Bloomfield and 5.8 miles east of Highway 550. This landscape is a unique subject for photographers especially August through October when dramatic storm clouds roll across the plains. See pg. 15

### THE BISTI BADLANDS

The granddaddy of badlands! A quick search online will show the varied terrain and demonstrate why photographers from across the globe travel to shoot the Bisti Badlands. From hoodoos and spires to fossils and petrified logs, the Bisti will not disappoint. On your first time out, we recommend hiking east from the parking lot towards the two red hills. If time is limited head to the right of the red hills for a wonderful section of hoodoos. For a full Bisti experience continue east and to the left of the red hills and then head towards the two black top hills. From this point it is best you explore the land on your own! Pack water, a compass and hike within your ability. See FarmingtonNM.org for information. See pg. 15

### FOUR CORNERS MONUMENT

Where in the United States can you stand in four states at once? Only at the Four Corners Monument. Snap a few fun pictures as visitors implement their creative poses. When your time arrives to approach the seal will you place hands in New Mexico and Arizona and your feet in Utah and Colorado or as a group hold hands across state lines? The photographic options are endless. This monument is a must photo op for anyone passing through the desert southwest. See pg. 16

### SHIPROCK PINNACLE

Standing 1,583 feet above the high-desert plains of the Navajo Nation, this sacred landmark is prominently visible within a 30 - 50 mile range of the peak in most directions. Breathtaking shots can be taken from as far as Farmington and Mesa Verde. The best views are west of Farmington from Hwy. 64 and south of Shiprock on Hwy. 491. For an up-close encounter travel south on Hwy. 491, past the pinnacle, and turn west on Route 13. This road will pass through a gap in the dike and connects to a variety of dirt roads that lead to the peak. Many of these dirt roads intersect private Navajo properties, be respectful. See pg. 16
